## **Profile**

Results-driven Project Manager and Scrum Master with over 10 years of experience in healthcare and technology. Proven track record in implementing Agile methodologies to enhance operational efficiency and project delivery speed. Skilled in managing budgets, resource allocation, and stakeholder relationships, consistently delivering projects under budget while maintaining high-quality standards. Expertise in using Jira for progress tracking and risk management. Committed to fostering a culture of continuous improvement and mentoring teams, leading to improved customer satisfaction and enhanced patient engagement.

## **Employment History**

Project Manager and Scrum Master, Hackensack University Medical Center (Quest Diagnostics)

MARCH 2021 - PRESENT

Led cross-functional teams in successfully implementing over **10** innovative diagnostic testing projects, resulting in a **20% increase in operational efficiency** and improved turnaround times for lab results.

- Managed the integration of state-of-the-art connectivity solutions that enhanced data-sharing capabilities across 2,250 patient service centers-, improving patient engagement.
- Led the development and launch of new clinical tests within a \$5 million budget, achieving on-time delivery and meeting regulatory compliance standards.
- Managed project budgets and resource allocation for multiple concurrent projects, consistently delivering under budget by 15% while maintaining high-quality standards.
- Implemented Agile project management methodologies to optimize project delivery processes, reducing project lifecycle timelines, and ensuring the successful management of scope creep.
- Developed and executed a training program for over 150 employees on new diagnostic protocols and testing technologies, focusing on minimizing scope changes and increasing team proficiency.
- Facilitated Agile ceremonies, including daily stand-ups, sprint planning, and retrospectives, fostering a culture of continuous improvement.
- Coached and mentored cross-functional teams on Scrum practices, guiding them through three major project releases that enhanced product quality and achieved stakeholder satisfaction ratings of 95%.
- Implemented tools and techniques to track project progress and manage impediments, reducing cycle times by 30% and ensuring timely delivery of features within the established scope and budget.

## Project Manager, Otsuka Pharmacetical

MARCH 2018 - MARCH 2021

**Led end-to-end project management** for the development of glycosylation-based drug candidates, ensuring adherence to timelines, budgets, and resource allocation across all project phases, resulting in **10% cost savings** in R&D.

- Accelerated drug development pipeline by optimizing glycosylation processes, improving the efficiency of candidate selection and preclinical testing, and contributing to faster go/no-go decision-making.
- Collaborated with R&D and manufacturing teams to integrate glycosylation technology into bioprocessing workflows, reducing production variability.

- Managed project timelines, budgets, and resources for multiple glycosylation-driven drug candidates, ensuring 100% on-time delivery of key milestones and reducing overall development costs by 15%.
- Led quality assurance efforts, ensuring that glycosylation-based drug candidates met all GMP and regulatory standards, resulting in zero critical findings during inspections.
- Applied earned value management (EVM) techniques to monitor project cost and schedule performance, resulting in a 15% improvement in budget adherence across key projects.

### **Project Manager and Scrum Master, Nokia**

JUNE 2014 - FEBRUARY 2018

**Developed and executed project roadmaps** for large-scale network infrastructure projects, ensuring alignment with customer expectations and delivering **98% on-time project completion**.

- Managed digital transformation projects, collaborating with global customers to implement 5G networks that increased data transmission speed by 50%.
- Orchestrated the end-to-end delivery of next-generation network infrastructure projects, reducing time-to-market through effective resource allocation and Agile methodologies.
- Facilitated partnerships between R&D and key customers, aligning the
  development of cutting-edge network services to customer needs, leading to a
  10% growth in contract renewals.
- Implemented risk management and quality assurance strategies across
  multi-site network deployment projects, reducing downtime and ensuring 100%
  compliance with regulatory and security standards.
- Conducted change management initiatives, including training programs and system handovers, to ensure the adoption of new cloud-based network systems by customer IT teams.

### Education

**B.Sc. Ed Physical Education** 

### Certification

- Professional Scrum Master 1 (PSM 1), scrum.org
- Certified Lean Six Sigma White Belt (CLSSWB), skillfront
- Six Sigma Yellow Belt, 6sigmastudy

## **Project Highlights**

- Innovative Diagnostic Testing Initiatives: Spearheaded the NextGen
   Diagnostics Project, enhancing lab workflows and improving patient outcomes
   through the integration of cutting-edge testing technologies.
- Advanced Connectivity Solutions Integration: Led the Data Connect Project-, enabling real-time data sharing and communication between healthcare providers, which improved patient care coordination.
- New Clinical Tests Development: Championed the Clinical Innovations
   Initiative, resulting in the successful introduction of five new diagnostic tests
   that expanded the testing menu and increased service capabilities.
